CITGO Petroleum RASP Performance History

June 30, 2009

Understanding investment performance: As you review this update, please remember that the performance data stated represents past performance, which does not guarantee future results. Investment return and principal value of an investment will fluctuate; therefore, you may have a gain or loss when you sell your shares. Current performance may be higher or lower than the performance stated. To learn more or to obtain the most recent month-end performance, call Fidelity or visit www.401k.com (log in, choose plan, select "Investment Choices & Research," and then pick investment option).

Fund line-up as of 07/05/09

Last categorization update date 06/30/09

Total returns are historical and include change in share value and reinvestment of dividends and capital gains, if any. Cumulative total returns are reported as of the period indicated. Life of Fund figures are reported as of the inception date to the period indicated. These figures do not include the effect of sales charges, if any, as these charges are waived for contributions made through your company's employee benefit plans. If sales charges were included, returns would have been lower.

Fidelity Freedom 2005 Fund,[®] Fidelity Freedom 2010 Fund,[®] Fidelity Freedom 2015 Fund,[®] Fidelity Freedom 2020 Fund,[®] Fidelity Freedom 2025 Fund,[®] Fidelity Freedom 2030 Fund,[®] Fidelity Freedom 2035 Fund,[®] Fidelity Freedom 2040 Fund,[®] Fidelity Freedom 2045 Fund,[®] Fidelity Freedom 2050 Fund,[®] Fidelity Freedom Income Fund[®]: Fidelity Freedom Funds[®] are subject to the volatility of the financial markets in the U.S. and abroad and may be subject to the additional risk associated with investing in high-yield, small-cap, and foreign securities.

Fidelity Magellan[®] Fund, Fidelity Puritan[®] Fund, Fidelity Capital Appreciation Fund, Fidelity Diversified International Fund, Fidelity Low-Priced Stock Fund: Initial offering of the retirement (K) class took place on May 9, 2008. Returns and expenses prior to that date are those of the non-K, non-advisor class. Had K class expenses been reflected in the returns shown, total returns would have been higher.

Fidelity Freedom 2005 Fund[®]: Total allocations may sometimes be over or under 100% due to rounding.

Spartan[®] International Index Fund, Fidelity U.S. Bond Index Fund: Fidelity is temporarily reimbursing a portion of the fund's expenses. Absent such reimbursement, returns would have been lower.

Indices are unmanaged and you cannot invest directly in an index.

Morningstar, Inc., provided data on the non-Fidelity mutual funds. Although the data is gathered from reliable sources, accuracy and completeness cannot be guaranteed by Morningstar.

*The current yield of the money market mutual fund listed above reflects the current earnings of the fund, while the total return refers to a specific past holding period. Fixed Income Fund: This investment option is not a mutual fund.

With the exception of domestic equity mutual funds, investment options have been assigned to investment categories based on Fidelity's analysis. Fidelity has verified the accuracy of the placement of certain third party non-mutual funds with either the plan sponsor or the plan sponsor's consultant. Within Domestic Equities, mutual funds are listed according to their actual Morningstar categories as of the date indicated. Morningstar categories are based on a fund's style as measured by its underlying portfolio holdings over the past 3 years and may change at any time. These style calculations do not represent the funds' objectives and do not predict the funds' future styles.

Expense Ratio Footnotes

For a mutual fund, the expense ratio is the total annual fund or class operating expenses (before waivers or reimbursements) paid by the fund and stated as a percent of the fund's total net assets. Where the investment option is not a mutual fund, the figure displayed in the expense ratio field is intended to reflect similar information. However, it may have been calculated using methodologies that differ from those used for mutual funds. Mutual fund data has been drawn from the most recent prospectus. For non-mutual fund investment options, the information has been provided by the trustee or plan sponsor. When no ratio is shown for these options it is due to the fact that none was available. Nevertheless, there may be fees and expenses associated with the investment option.

Investment Risk

Foreign investments, especially those in emerging markets, involve greater risk and may offer greater potential returns than U.S. investments. This risk includes political and economic uncertainties of foreign countries, as well as the risk of currency fluctuation.

In general, bond prices rise when interest rates fall, and vice versa. This effect is usually more pronounced for longer-term securities.

Investments in mid-sized companies may involve greater risk than those of larger, more well known companies, but may be less volatile than investments in smaller companies.

Investments in smaller companies may involve greater risk than those in larger, more well known companies.

An investment in a money market fund is not insured or guaranteed by the FDIC or any other government agency. Although money market funds seek to preserve the value of your investment at \$1 per share, it is possible to lose money by investing in these funds.

Index Definitions

BC U.S. Aggregate: The Barclays Capital U.S. Aggregate Bond Index is an unmanaged market value-weighted index for U.S. dollar-denominated investment-grade fixed-rate debt issues, including government, corporate, asset-backed, and mortgage-backed securities with maturities of at least one year.

CG 3-Month Treasury Bill: The Citigroup 3-Month Treasury Bill Index is an unmanaged index designed to represent the average of T-bill rates for each of the prior three months, adjusted to a bond-equivalent basis.

MSCI EAFE (Net MA): The Morgan Stanley Capital International Europe, Australasia and Far East (MSCI EAFE) Index (net MA tax) is an unmanaged market capitalization-weighted index of equity securities of companies domiciled in various countries. The index is designed to represent performance of developed stock markets outside the United States and Canada and excludes certain market segments unavailable to U.S.-based investors. The index returns for periods after 1/1/1997 are adjusted for tax withholding rates applicable to U.S.-based mutual funds organized as Massachusetts business trusts.

Russell 1000 Value: The Russell 1000[®] Value Index is an unmanaged market capitalization-weighted index of value-oriented stocks of the largest U.S.-domiciled companies that are included in the Russell 1000 Index. Value-oriented stocks tend to have lower price-to-book ratios and lower forecasted growth values.

Russell 2000: The Russell 2000[®] Index is an unmanaged market capitalization-weighted index of 2,000 small company stocks of U.S.-domiciled companies.

Russell 2000 Value: The Russell 2000[®] Value Index is an unmanaged market capitalization-weighted index of value-oriented stocks of U.S.-domiciled companies that are included in the Russell 2000 Index. Value-oriented stocks tend to have lower price-to-book ratios and lower forecasted growth values.

S&P 500: The S&P 500[®] Index is a registered service mark of The McGraw-Hill Companies, Inc., and has been licensed for use by Fidelity Distributors Corporation and its affiliates. It is an unmanaged index of the common stock prices of 500 widely held U.S. stocks that includes the reinvestment of dividends.

Before investing in any mutual fund, please carefully consider the investment objectives, risks, charges, and expenses. For this and other information, call or write Fidelity for a free prospectus. Read it carefully before you invest.
